JANUARY COMMITTEE MEETINGS

October 30, 1990 TO: RESEARCH COMMITTEE NO. 26-90 RE: JANUARY COMMITTEE MEETINGS

@@
@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@ We are planning for our mid winter Committee meeting, held this year at the Doral Ocean Beach Resort in Miami on January 16-18, 1990. You will have received a memo from Dick Pogue, under separate cover, with the full program for all committees and registration information. Our Committee meeting on January 16 will be a different format this year from the past. The day will be devoted to workshops set on two subjects that are of central importance to the functioning of our Committee. 1. Using the 1990's study and other background, what is the direction of the Research Agenda up to 1995? 2. The Research Committee - who are we? What is our mandate from the industry? The meeting format will be called a retreat and only Research Committee members will participate. The first part of the day the Committee will divide into two groups to discuss any and all aspects of each group's assigned topic. After a short break the groups will combine and report on their main considerations. Discussion will continue until the Committee has developed some direction on each topic. The Committee collectively spends several hundred hours of work each year representing the industry's views on research. This retreat is designed for members to examine progress and processes and to set a course for the next few years. This will be an important meeting and I encourage all Committee members to attend, especially those who are Committee veterans. Please make your hotel reservations early according to the registration form you have received. Feel free to call either Sandy West (202) 955-3509 or me (212) 713-2082 for further information. You will receive additional program material in due course. I look forward to seeing you there. Tom Mack Chairman ICI Research Committee
